THE SOLUTION IS CLEAR

Join so many others who  
have enjoyed their smile  
journey with OrthoAlign.

It's all about the accessories!  
We've curated six essential items and put them all in one  
convenient travel bag.  
Ask your doctor how you can enjoy these perks.  
Travel anywhere in style and enjoy your smile journey!

OrthoAlign is your dentist's preferred partner.

**NEED A SOLUTION?  
BETTER MAKE IT  
CLEAR**

# WHY ORTHOALIGN?

OrthoAlign is a clear and comfortable alternative solution to straighten teeth without wires or braces. With this modern approach, you are able to reduce the amount of time you would ordinarily wear braces.

Custom designed for you, every movement is precisely calculated. Each aligner is worn for 2 weeks, before moving on to the next set of aligners. Week by week, your teeth will make subtle movements until the final position is achieved as prescribed in the treatment plan.

## REMOVABLE

Brushing and flossing no longer have to be a chore as the aligners are removable, so oral hygiene is easily maintained during treatment. Feel free to continue eating and drinking as you enjoyed before.

## INVISIBLE

Our products and methods allow us to fabricate highly aesthetic, transparent aligners that patients can feel confident about.

## COMFORTABLE

Custom made for each patient, the smooth surface of the aligners provide comfort and a perfect fit to match your teeth and gums.

## AFFORDABLE

Our advanced techniques and the fact that our aligners are fabricated locally in-house, allow us to offer a cost effective and more affordable option for patients.

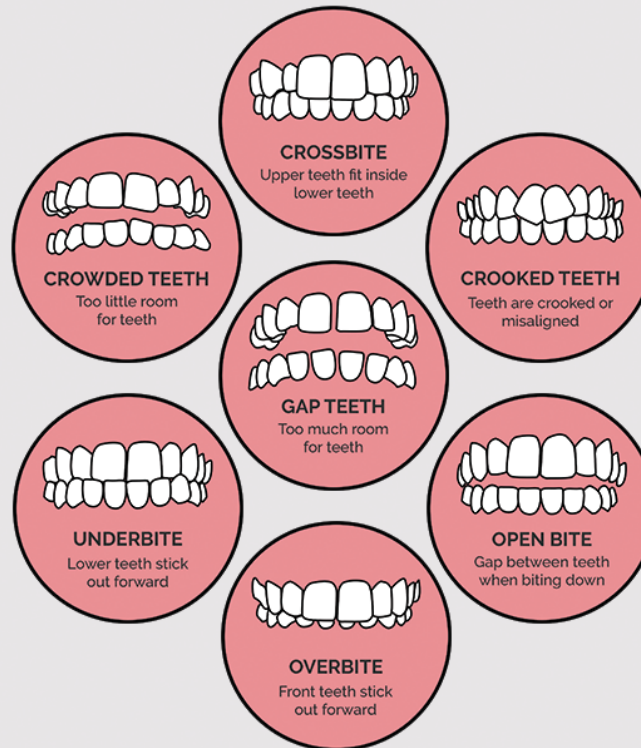

## LESS ABRASIVE

Decreased occlusal abrasion during aligner treatment as teeth are protected.

# IS ORTHOALIGN RIGHT FOR YOU?

## TREATABLE CASES

Understanding case selection is an important factor when it comes to achieving successful treatment outcomes.

With the help of innovative digital technology and expert analysis, we are able to develop clear aligners that treat a variety of tooth movements. From teeth misalignment to severe cases of malocclusion and bad bites.

Factors such as available space, retention and anchorage also play a critical role in attaining final results.

# orthoFLX

## INTRODUCING OrthoFLX

Advancing the art and science of aligner treatment.

### Why OrthoFLX?

- Avoid** inconvenience & relapses
- Avoid** multiple trips to the clinic
- Avoid** unnecessary extra costs

OrthoFLX offers all the advantages of comfort, durability, and aesthetics.

Its smart technology combines three layers. Two thin, rigid shells that grip the teeth firmly and protect the thermoformed appliance and a third, central layer that provides elastic rebound.
